

**syslink Xandria** is the leading System Management application for SAP® Solutions. It provides a bunch of benefits: down-to-earth, easy to use, hassle-free expandability - the **Xandria** way of doing things!

Now all of this is available for databases as well!

Are you interested? Call us at +41 61 295 9999 or write an email to [info@syslink.ch](mailto:info@syslink.ch).

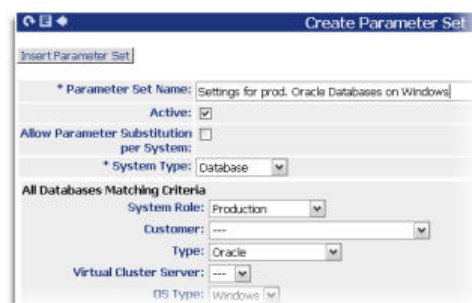

We will be glad to assist you in evaluation or testing!

*Technical Data (Excerpt):*

- Support for Oracle, IBM DB2, and MaxDB/SAP DB databases as well for the Microsoft SQL Server.
- Monitors tablespace usage ratios considering automatic growth/extensions and the underlying file system sizes.
- Tracking of all database parameter changes including the option to compare them across system boundaries.
- Monitoring of backup execution and consistency.
- Support for high-availability cluster installations.
- Monitoring of the Oracle alert log or the IBM DB2 diagnostics log file.
- Recording and Reporting of database availability and the most important performance indicators: table space usage ratio, number of sessions, cache and buffer hit ratio, deadlocks, waits, etc.
- Breezing expandability to fit perfectly into your business environment.

Databases in RealTime Monitoring

Parameter Set Name: Settings for prod. Oracle Databases on Windows  
 Active:   
 Allow Parameter Substitution per System:   
 System Type: Database  
 All Databases Matching Criteria:  
 System Role: Production  
 Customer: ---  
 Type: Oracle  
 Virtual Cluster Server: ---  
 OS Type: Windows

Monitoring Parameter Sets for Databases

Oracle Data Buffer Hit Ratio

**Supported Databases:**

- Oracle 8i and later
- IBM DB2 8.2.2 and later
- Microsoft SQL Server 2000, 2005, 2008
- MaxDB (SAP DB) 7.3 and later

**Supported Operating Systems:**

- UNIX (IBM AIX, HP-UX, Linux, SUN Solaris, Tru64)
- Microsoft Windows
